## Otsuka Foods to Revise Price of Packaged Rice Products, Effective for Deliveries from March 1, 2020

TOKYO, Japan, January 20, 2020—Otsuka Foods Co., Ltd. (Head Office: Chuo Ward, Osaka; President: Atsumasa Makise) announced today that it will revise the suggested retail price for “150 kcal My Size Mannan Gohan” and the single pack and triple packs of “160-gram Mannan Gohan,” with the changes taking effect for products delivered from March 1, 2020.

Otsuka Foods has been striving to improve productivity, streamline logistics, reduce expenses, and make other corporate efforts to rationalize management. However, due to sharp rises in the price of rice, which is the main raw material for packages of cooked rice, and the rise in logistics costs in recent years, it has become difficult to absorb the cost increases in packaged rice products. The company has therefore decided to revise the prices upward.

Going forward, Otsuka Foods will continue to promote efficiency and to provide high-quality products and services that create new value, and it asks for customers’ understanding regarding the price increases.
